The First Line of Defense

Be proactive, not reactive

Hackers are constantly improving their tactics to get unsuspecting employee to open the door to sensitive data. Let's work together to slam the door on cybercriminals.

Technology Alone is Not Enough

01 Employee Training & Defense

02 Firewall/Anti-Virus/
Anti-Malware

03 System Patching/
Encryption/Backup Solutions

Cybersecurity is a shared responsibility

With human error causing 95% of data breaches, working together to create a layered security strategy can actively reduce risk to your business.

Criminals are smart; they know how to get through the cracks. If your employees know what to look for, they'll be less likely to fall for a scam that could put your business at risk.

Don't wait until it's too late

Strengthen your first layer of defense! By engaging in our security awareness training focused on phishing, ransomware, and business email compromise scams, you are implementing a proactive approach to preventing a data breach.
